

# Asem Mosleh

**Address:** Amman, Jordan | **Phone:** 00962790225015

**Email:** asem.om95@gmail.com | **LinkedIn :** <https://www.linkedin.com/in/asem-musleh-5937371b6/> | **GitHub:** <https://github.com/Asemmu>

## Summary

---

Experienced software developer with a strong background in software engineering, expert in both back-end and front-end development. Writing and implementing, clean, scalable code. Troubleshooting and debugging code.

Proficient in web development and skillful in devising solutions across various technologies. Consistently delivers high-quality systems exceeding customer expectations using multiple programming languages and frameworks such as PHP, JavaScript, Node.js, React, and Express.js.

## SKILLS

---

### Technical Skills:

- Excellent skills in programming languages (PHP, Javascript)
- Test driven development (PHP unit, Jest)
- ExpressJs, Laravel, TypeScript
- HTML5, CSS3, JavaScript
- jQuery, React, Bootstrap, SCSS, Redux
- Extensive knowledge in both Sql(Mysql, postgres, sql server) and Nosql (MongoDB, Firebase) DBs
- API Development & Integrations
- Cloud services (AWS, digital Ocean)
- XML, Ajax, JSON, ES6, SASS
- Source control: Git & GitHub
- handson with logging, monitoring and debugging

### Soft Skills:

---

- Leadership and Team management
- Problem-solving skills
- Time organization
- Methodical analysis
- Details oriented
- Troubleshooting
- Empathy, Creativity
- Continuous learning
- Listening skills
- Teamwork
- Ethical responsibility
- Excellent oral & written communication
- Adaptability
- work well under pressure

## Professional Experience

---

**Systems Development Team Leader** Jan 2023 - Present

**Extensya, Amman**

- Manage Job assignments on a day-to-day basis and following up on blocks.

- Handling comprehensive business and data analysis for software development strategies on over 30 projects.
- Participate in setting the team's processes and rules.
- Collaborating closely with internal and external auditors ensuring 100% complete compliance and upgrading security in software projects.
- Strategically planning and developing software programs, meeting 100% of requirements, while seamlessly merging existing products and resolving platform compatibility issues.
- Innovating and creating advanced web tools, empowering employees and partners to attract clients, and consistently achieving 100% on-time delivery.
- Heading development teams of 12 members, achieving better performance and productivity.
- Executing rigorous in-house testing of programs, accurately reporting faults, and initiating comprehensive technical documentation and test procedures, resulting in a significant 40-50% reduction in user error reports.
- Iteratively upgrading code to enhance software quality and functionality, leading to a remarkable 50% improvement in our code system's performance.
- Assuming a leadership role in the technical aspects of the software development process, consistently adhering to standards and requirements.
- Providing uninterrupted, high-quality support for applications, obtaining an impressive 99.9% uptime, and minimizing the impact of defects.
- Conducting a thorough evaluation and seamless implementation of security technologies to protect information resources.
- Actively contributing to hazard assessments, establishing operational controls, and ensuring strict adherence to security regulations within software systems.

### **Senior software developer Jan 2022 - Jan 2023**

#### **Extensya, Amman**

- Gathering and discussing client requirements, promising a clear project understanding, and alignment for more than 20 clients.
- Maintaining and overseeing around three central databases, promptly addressing requests from both front-end and back-end developers.
- Diagnosing and resolving application and code issues to guarantee software stability.
- Designing robust REST APIs and system structures to facilitate efficient and scalable solutions.
- Integrating third-party services, social media platforms, and data storage solutions to optimize system functionality.
- Administering approximately 9 Linux and Windows servers, overseeing system configurations and user privileges.
- Transferring complex systems to new servers or databases, minimizing downtime, and preserving data integrity with a 100% success rate.
- Managing user authentication and authorization procedures, implementing security protocols using around 4 methods such as JWT, Sessions, Access tokens, and Refresh tokens.
- Improving website performance on both the front and back ends, resulting in an enhanced user experience.

- Collaborating with front-end, back-end web, and mobile developers to seamlessly integrate all components.
- Developing and coding server-side logic for applications to ensure functionality and performance.
- Finalizing back-end features and handling comprehensive automated testing of web applications, resulting in high-quality, bug-free releases.
- enforcing web security best practices, including OWASP Top Ten.

### **Software development officer Feb 2020 - Jan 2022**

#### **Extensya, Amman**

- Creating over five interactive applications using PHP, Node.js, HTML, JavaScript, and CSS, guaranteeing exceptional traffic, page views, and user experiences with 100% on-time delivery.
- Devising and executing internal systems and tools for talent acquisition, attendance tracking, and internal chat systems to enhance organizational efficiency.
- Successfully integrating around six social media platforms such as Facebook, Twitter, and Instagram to expand user engagement and interaction.
- Systematically monitoring and addressing issues and bugs to maintain 100% software quality and reliability.
- Dealing with comprehensive user requirement gathering to align precisely with stakeholders' needs for software solutions.
- Managing two database types, including SQL Server, MySQL, MongoDB, and Postgres, to affirm data integrity and reliability.
- Optimizing database structures and query performance across multiple systems which improved efficiency and responsiveness by 50%.

## **EDUCATION**

---

Bachelor of Engineering (B.E.) - Computer Engineering Jan 2014 - Jun 2020  
The University of Jordan, Amman

## **LICENSES & CERTIFICATIONS**

---

- NodeJS - The Complete Guide (MVC, REST APIs, GraphQL, Deno) 2023, Udemy
- OOP PHP & MVC 2022, Udemy
- JavaScript Algorithms and Data Structure 2022, FreeCodeCamp
- Back-end Development and APIS 2021, FreeCodeCamp
- Responsive Web Design 2021, FreeCodeCamp
- front-end Technologies 2021, FreeCodeCamp
- Full Stack Development 2021, Udacity
